Vashist Narayan Singh

AI Technical Expert

vashistnarayansingh@gmail.com | (+91) 9168562892 | linkedin.com/in/vashistnarayan-singh |Mumbai -MH

EDUCATION

University Of Mumbai **Aug 2017**

Bachelor of Engineering**,** Electronics & Telecommunication Engineering

CGPA: 7.5/10.00

TECHNICAL PROFICIENCY

- **Programming:** Python, SQL, Pyspark
- **Technologies:** GenAI, RAG, Agentic AI, Agentic RAG, Machine learning, Deep Learning, NLP, Computer Vision(Basics), XGBoost, NumPy, Pandas, Sklearn
- **Visualization:** MS PowerBI
- **Databases:** MySQL
- **Frameworks:** Keras, Tensorflow, Flask, FastApi
- **IDE and Version Control:** Visual Studio, SVN, Git
- **Monitoring:** ML flow
- C**loud:** OCI Data Science, Azure Databricks, Azure ML Studio
-

WORK EXPERIENCE

Sutherland Global Services **Chennai, TN**

Lead Data Scientist , AICOE **May 2023 – July 2026**

Lenovo Log Forecaster:

- **Tech Stack:** Python, PySpark, Machine Learning, Data Analysis, Azure Databricks
- **Development:** Built a machine learning forecaster model to predict top storage device component failures proactively.
- **Impact:** Enabled early maintenance alerts, reduced unplanned downtime, and improved spare part planning.
- **Architecture Design:** Implemented ETL pipelines, model training, deployment, and monitoring using Azure Databricks and Blob storage.
- **Communication:** Partnered with technical leads to debug and optimize deployed pipelines.

OCI :

- **Tech Stack:** Python, GenAI, RAG, OCI Data Science
- **Development:** Developed a RAG-based resume screening tool that matches candidate resumes with job descriptions and deployed it on OCI.
- **Impact:** Improved hiring efficiency by automating shortlisting and ensuring high-accuracy candidate screening..
- **Architecture Design:** Designed a RAG architecture leveraging OpenAI LLMs, prompt engineering, and OCI model deployment.
- **Communication:** Coordinated with cross-functional teams to manage deployment and fix bugs.

Steris :

- **Tech Stack:** Python, NLP, Machine Learning, Data Analysis, Azure ML Studio
- **Development:** Built a classification model to organize unstructured medical components into predefined categories.
- **Impact:** Achieved an F1-score of 89%, reducing manual workload by 50% and optimizing inventory management accuracy.
- **Architecture Design:** Developed a multiclass classification model and deployed it in Azure ML Studio as an endpoint.
- **Communication:** Worked closely with leads and managers to troubleshoot and enhance system performance.

Fraud Analytics :

- **Tech Stack:** Python, Data Analysis, NLP, Streamlit, FastApi
- **Development:** Built a vendor demographic and rule-based engine that detects deviations in vendor transaction patterns.
- **Impact:** Enables early identification of abnormal vendor behavior, triggers manual investigation alerts, and generates labeled data for future predictive models.
- **Architecture Design:** Designed a Streamlit dashboard for vendor analytics and a Flask-based platform to verify invoice authenticity.
- **Communication:** Collaborated with leads and managers to identify and resolve client-site issues.

Knight Fintech Research Pvt Ltd. **Mumbai, MH**

Associate Data Scientist, Research and Development **Aug 2020 – April 2023**

- **Tech Stack:** Python, Deep Learning, Machine Learning, NLP, FastApi, Flask, AWS, Multiprocessing, pyodbc, SQL, Selenium
- **Development:** Built Face recognizer, OCR, Sentiment analyzer, Text Classifier, Time series Classifier and forecasting webapps and introduced new features in the enterprise level product in multiplereleases
- **Impact:** Modeled webapps with AI features as R & D team member which reduced the work time of 1-2 weeks to instant
- **Architecture Design:** Designed a RAG architecture leveraging OpenAI LLMs, prompt engineering, and OCI model deployment
- **Scripting:** Written python scripts for environment setup, reduced setup time from 2 hours to 20 minutes
- **Communication:** Coordinated with founder and leads, managers to diagnose and fix client-site bugs

Asepsislife.inc **Bengaluru, KA**

Trainee Machine Learning Engineer **Oct 2018 – Mar 2019**

- **Tech Stack:** Python, NLP, Nodejs, Deep Learning, Machine Learning
- **Development:** Built training dataset, custom NER for model training and introduces new variation into the dataset in multiple modeling
- **Impact:** The model performance is improved by 50-60 percent
- **Scripting :** Written python script for automating the data generation and storage
- **Communication:** Coordinated with founder and other teammates to diagnose and fix the bugs

PRDXN **Mumbai, MH**

Trainee Web Developer **Nov 2017 – Mar 2018**

- **Tech Stack:** HTML, CSS, JavaScript
- **Web Development:** Developed the front end of the client's website and Chabot
- **Communication:** Coordinate with leads and manages and test teams for frontend changes

Professional Achievement

- **Hackcelerate 2024 Winner:** Secured 1st place among hundreds of competing data science teams by designing and deploying an end-to-end AI solution that demonstrated exceptional innovation, technical depth, and business impact.
- **Consistent 4.5+ Rated Performer:** Maintained a top-tier performance rating for multiple consecutive review cycles, recognized for delivering high-impact AI/ML solutions, cross-functional collaboration, and operational excellence.

CERTIFICATES

- **Generative Ai with LLMS, Coursera** **Mar 2024**
- **Applied Ai Course, AAIC Tech Pvt Ltd** **Apr 2020**
- **Machine Learning authorized by Stanford, Coursera** **Apr 2018**
